January	19 Days	Revision
February	22 Days	Revision

Subject - Tabla

Months	Days	Tabla
April & May	36 Days	Knowledge of Basic Bol in Tabla like Dha, Ta, Din, Dhin, Na tete
June To August	57 Days	Revision and counting 16 beat with tali & Kahli by hand beat and also one simple kayda in 16 beat like Gege Tete Na Na Ke Ke Tete Gege Na Na
September	24 Days	Revision
October To December	70 Days	Revision and than variation of Kayda in 16 beat Gege Tete Gege Na Na No. of variation 3 and Tihai and than No. 2 Kayda Dha Dha Tete Dha Dha Dhin Na
January & February	41 Days	Revision and new variation of 16 beat Kayda Dha Dha Tete Dha Dha Tuna.....etc.

Subject - Synthesizer & Guitar

Months	Days	Synthesizer & Guitar
April & May	36 Days	Knowledge of Basic Alankr's in Casio/Guitar
June To August	57 Days	Revision and New Hymns with New Alankars Ex. Be careful, Beautiful life
October To December	70 Days	Variations of Alankars in 16 beats and new hymns
January & February	41 Days	New Variety of Alankars with Rhythm and school Hymn. Ex. Here us O'lord, Walking

10 TIPS TO IMPROVE YOUR STUDY HABITS THIS SESSION

How did your studies go last term? Did you spend time learning things as they were being taught, or did you end up having to go through marathon study sessions the night before your finals?

Improving study methods a week before exam isn't going to help. But if you get the right habits early on in the term, you can save yourself time and agony later.

Here are some tips for improving your study habits this session:

1. **Use 30-Days Trials:** Popularized by Steve Pavlina, trial periods work under the principle that by committing to a change for a month, it will become a habit.
2. **The Learn-It-Once Approach:** Spend your time learning things as they come up in your courses. Attend classes with the perspective that you could be tested at any moment. Waiting before tests, assignments or finals is taking things too far.
3. **Morning Review:** Wake up half an hour earlier and spend that time reading from your textbook. If you've already read the chapters, spend the time re-writing the key concepts into a notebook. A half-hour out of your day in the morning probably won't create a huge impact on your schedule, yet over the entire term it can be invaluable in boosting your understanding.
4. **Link Courses to Daily Life:** Spend some time each week looking for practical ways you can use the information you are learning. If you can find situations from your daily life that are similar to your subjects, they can go from abstract theories to concrete tools.
5. **Background Reading:** Invest some of your time each week in reading the background of the ideas surrounding your subjects. Pick out interesting topics in the news or books that make use of ideas from your field of study. Background reading can reinforce the ideas by connecting them with reality.
6. **Set Daily Study Times:** Set periods of time that you will spend studying each day. Once you spend a month reinforcing these learning periods, it will become automatic. Regular study times prevent the need for cramming and can give you consistency in your schedule.

7. **Focus on Learning, Not Grades:** Grades are just an artificial marker used to assess how much you've learned. While they are useful as a measurement tool, focusing on grades over understanding and learning useful ideas waste your time. Look for ways you can use the material you are learning and focus on understanding it first, put grades afterwards.
8. **Read Papers Upside Down:** A good editing habit, when checking over your essays and assignments, is to read them upside down. This prevents you from speed-reading the page and missing grammatical or sentence structure errors. This also gives you a better feeling of how an essay might be read through fresh eyes, letting you improve your style.
9. **The 10-Years Old Rule:** Pretend you had to teach everything in your course to a ten-years old. Could you do it? While advanced theoretical physics might not be comprehensible by a young child, the idea is that you should be able to simplify your subject into easily understandable pictures and metaphors. If you can do this for yourself, it will make your job far easier for remembering later.
10. **Seek your Teachers Help:** It is recommended to meet your teacher during school hours and ask for suggestions for improvement, in case you score marks less than your expectations or commit frequent errors in your answers. By doing this you will not only have a wealth of information about how answers are marked, but your teacher will also give you ways and means to improve your answers.

PLEDGE

“India is my country,
all Indians are my brothers and sisters.
I love my country, and
I am proud of its rich and varied heritage.
I shall always strive to be worthy of it.
I shall respect my parents, teachers and all elders
and treat everyone with courtesy.
To my country and my people,
I pledge my devotion.
In their well-being and prosperity.
alone lies my happiness.”
